We cannot reconcile our estimated ranges for adjusted gross profit to loss from operations, the most directly comparable GAAP measure, and cannot provide estimated ranges for loss from operations, without unreasonable efforts because of the uncertainty around certain items that may impact loss from operations, including equity-based compensation expense and depreciation and amortization, that are not within our control or cannot be reasonably predicted.

2. Adjusted EBITDA is a non-GAAP financial measure that is presented as supplemental disclosure, that we define as net income (loss) before interest expense, income taxes, depreciation and amortization expense, reorganization and transaction-related expenses and equity-based compensation expense. We cannot reconcile our estimated ranges for Adjusted EBITDA to net loss, the most directly comparable GAAP measure, and cannot provide estimated ranges for net loss, without unreasonable efforts because of the uncertainty around certain items that may impact net loss, including equity-based compensation expense and depreciation and amortization, that are not within our control or cannot be reasonably predicted.

Non-GAAP Financial Measures

Certain of these financial measures are considered “non-GAAP” financial measures within the meaning of Item 10 of Regulation S-K promulgated by the SEC. We believe that non-GAAP financial measures provide an additional way of viewing aspects of our operations that, when viewed with the GAAP results, provide a more complete understanding of our results of operations and the factors and trends affecting our business. These non-GAAP

financial measures are also used by our management to evaluate financial results and to plan and forecast future periods. However, non-GAAP financial measures should be considered as a supplement to, and not as a substitute for, or superior to, the corresponding measures calculated in accordance with GAAP. Non-GAAP financial measures used by us may differ from the non-GAAP measures used by other companies, including our competitors. To supplement our consolidated financial statements presented on a GAAP basis, we disclose the following non-GAAP measures: Medical Benefits Ratio, Adjusted EBITDA and Adjusted Gross Profit as these are performance measures that our management uses to assess our operating performance. Because these measures facilitate internal comparisons of our historical operating performance on a more consistent basis, we use these measures for business planning purposes and in evaluating acquisition opportunities.

Adjusted EBITDA

Adjusted EBITDA is a non-GAAP financial measure that we define as net loss before interest expense, income taxes, depreciation and amortization expense, reorganization and transaction-related expenses and equity-based compensation expense.

Adjusted EBITDA should not be considered in isolation of, or as an alternative to, measures prepared in accordance with GAAP. There are a number of limitations related to the use of Adjusted EBITDA in lieu of net loss, which is the most directly comparable financial measure calculated in accordance with GAAP.

Our use of the term Adjusted EBITDA may vary from the use of similar terms by other companies in our industry and accordingly may not be comparable to similarly titled measures used by other companies.

Medical Benefits Ratio (MBR)

We calculate our MBR by dividing total medical expenses excluding depreciation and equity-based compensation by total revenues in a given period.

Adjusted Gross Profit

Adjusted Gross Profit is a non-GAAP financial measure that we define as loss from operations before depreciation and amortization, clinical equity-based compensation expense, and selling, general, and administrative expenses.

Adjusted Gross Profit should not be considered in isolation of, or as an alternative to, measures prepared in accordance with GAAP. There are a number of limitations related to the use of Adjusted Gross Profit in lieu of loss from operations, which is the most directly comparable financial measure calculated in accordance with GAAP.

Our use of the term Adjusted Gross Profit may vary from the use of similar terms by other companies in our industry and accordingly may not be comparable to similarly titled measures used by other companies.
